cmd

version info:
node --v
npm --v

update node:
npm i npm -g to update

typescript cli:
npm install -g typescript

angular cli:

npm install -g @angular/cli
https://cli.angular.io/
ng version

ng new ng-pb-app --skip-git

--style=scss
--routing
--prefix=pb

cd .\ng-pb-app
ng serve -o

ng g module test

ng g component test/test-item --module=test
--inline-template --inline-style

ng g service test/test-service --module=test

ng generate class test/test-model
ng generate module shared

problems:
npm uninstall -g @angular/cli (uninstall current angular cli)
npm cache clean, npm cache verify (modules cleanup)
ng config -g cli.warnings.versionMismatch false (multiple angular version warnings)
